

RFID Stock Management From D-Tech

D-Tech Stargate Antenna

RFID is the technology to help you extract the maximum potential from your library.

The D-Tech Stargate is available as a single aisle (two antennae frames), dual aisle (three antennae frames) or triple aisle (four antennae frames) system.

The gates are used for reading the D-Tech security labels, which provide item security with an acoustic and/or visual signal, along with statistical data which can be collected with the gate viewing software.

Power and Data

Two single 13 amp power sockets between one to five metres from the antennas of the unit at mid-low level. Clean earthed supply.

Space to fit electronics and reader modules wall mounted at mid to low level. Cable (CAT5 equivalent) to be laid between reader and staff station PC.

Data socket (shared with the staff workstation for gate tracking).

**D-Tech offer the complete solution for all your RFID needs.
