

RFIQ Security System Exclusively From D-Tech

Introducing the new RFIQ (Radio Frequency IQ, as in Smart) System Exclusively from D-Tech

RFIQ is a new, no software technology, designed and developed by D-Tech as an entry level to RFID for school and college libraries.

RFIQ's design is based on the principles of RFID creating a unique feature - the ability for a library to seamlessly upgrade to full blown RFID at a later date. This is a technology that grows with a school library and its students.

Customer Comment (Niall Mullen, Opposite)

I liked the idea that RFIQ is upgradeable to RFID in the future. The fact that it wasn't that different to EM cost wise, means that we are getting something potentially better for not much more cost that is very attractive. I suppose you could say that RFIQ is extensible - that's the word!"

OVERVIEW

A transformational technology

Enhanced security performance

Electronic deactivate and reactivate

Integration into LMS

Manual mode for non LMS sites

Offline backup

Uses D-TechChip Smart Labels

An affordable path for any security option with easy migration towards RFID later.
