

24 Hour Book/Audio Book & DVD Vendortech Vending Machine Exclusively From D-Tech

Introducing the new 24 hour vending machine, exclusively from D-Tech

Library24 looks like a cash machine, giving your customers access to books, audio books and DVDs 24 hours a day, 7 days a week, without the need to increase opening hours or additional staffing costs.

From the touch-screen your customers can choose from a variety of media available. You decided the amount and variety.

The vending machine works with a card reader, which users insert and once verified the machine will supply the user with the requested item. Returns are just as simple.

What's better is that the returned item is immediately available to be borrowed by the next user.

The vending machine can be linked to your main library system via a sip2 service, enabling instant customer and LMS status/updates in real-time.

A round the clock library service which can assist in gaining new customers who otherwise would be unable to get to a library during the opening hours - thus increasing the borrowing rate enormously.

The basic model shown holds 200 items, extensions can be added to increase the capacity of the machine to suit the library requirements.
